I am submitting the following items (Check all that apply)

- ☐ CBU Health Form Documentation
- ☐ Seasonal Influenza Vaccination Documentation
- ☐ COVID-19 Vaccination Documentation
- ☐ Exemption due to fully online or off-campus semester schedule.

CBU Health Form

All students must have the following form completed by their health care provider, and returned to the Health Resources Office prior to beginning classes.

For a copy of the General Student Health Form, [click here](#).

For the Masters in Physician Assistant Studies documentation, [use this link](#).

CBU Health Form Documentation Upload (16 MB Limit)**SELECT FILES****Seasonal Influenza Vaccination**

Getting a flu vaccine is more important than ever to protect yourself and the people around you from flu and to help reduce the strain on healthcare systems responding to the COVID-19 pandemic. In fact, the Centers for Disease Control recommends that everyone — with very rare exceptions — should get a seasonal flu vaccine. (For info on the flu and its prevention, visit [cdc.gov/flu/](https://www.cdc.gov/flu/).)

For that reason and for the continued health and well-being of our community, **Christian Brothers University is requiring all students who are taking classes on campus and/or using campus facilities such as the library, computer labs, or athletic facilities during the 2021-2022 academic year to provide verification to the University that they have had the flu vaccine administered.**

Influenza is a highly contagious respiratory illness that's caused by the influenza virus. There are two main types of influenza virus: type A and type B. These main types are further subdivided into multiple subtypes and strains, including the well-known H1N1 strain. Located around the world are influenza surveillance centers that annually monitor the most common strains, collecting data and identifying new and evolving strains. Once the information has been collected, the World Health Organization selects the three strains most likely to circulate during the following flu season. This decision is typically made in February, allowing the development of a new vaccine to begin around midsummer. Because the three strains change each year, the vaccines are formulated separately before they're combined into the final product, the trivalent vaccine. In addition to the constantly evolving strains of the flu virus, your body's immune response changes over time. Taken together, those two factors essentially render the previous years' vaccinations useless against new strains. The flu season ranges roughly from October-March. Because the flu vaccine takes about two weeks to fully protect you from viral antibodies, the CDC recommends that adults are annually vaccinated by the end of October.

Exemptions

- Students who are completely remote/online are exempt from this requirement but are still required to fill out the online form indicating this status. In order to comply with SEVIS registration requirements, international students cannot be fully online.
- Students seeking an exemption from this vaccination due to a medical reason, or because of a sincerely-held religious belief, will need to upload documentation.

Documentation to Provide the University

For medical exemptions, a physician or advanced practice clinician must attest that the individual's medical status contraindicates the individual's vaccination.

For religious waivers, individuals will provide information to identify the sincerely held religious belief, practice, or observance that is the basis for the request for waiver, with the signature of and contact information for a religious leader on their professional letterhead. Each request for an exemption will be evaluated individually on a case-by-case basis.

Accommodations will be granted when they do not cause undue hardship to the University or pose a direct threat to the health and safety of others.

Vaccination Status

- ☐ I have been vaccinated.
- ☐ I am requesting an exemption.

Exemption Request Type

- ☐ Medical ☐ Religious

SELECT FILES**COVID-19 Vaccination Documentation**

COVID vaccinations are strongly encouraged for all persons who live, learn, and work on the Christian Brothers University campus.

Vaccination Status

- ☐ I have been vaccinated.
- ☐ I am requesting an exemption.

For medical exemptions, have a physician or advanced practice clinician complete and sign [THIS FORM](#) to attest to the individual's medical status that contraindicates vaccination.

For religious exemptions, the documentation should be on professional letterhead and must identify the sincerely held religious belief, practice, or observance that is the basis for the request. It should be dated signed by your religious leader with their complete contact information.
